

SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR SUPPLIER SELECTION IN A SUPPLY CHAIN MANAGEMENT FRAMEWORK

ABSTRACT

5

A system, method and computer program product are disclosed for selecting suppliers in a supply chain management framework. A network is utilized to receive data from at least one store of a supply chain that relates to the sale of goods by the at least one store. An electronic order form is generated based on the data for ordering goods from a distributor of the supply chain. Supplier information is received from a management headquarters utilizing the network. The supplier information includes a plurality of suppliers selected to supply the store with the goods. The supplier information is then used to transmit the electronic order form to the selected suppliers of the supply chain utilizing the network.
